Professional Experience

Accenture — Braga/Coimbra, Portugal
Full Stack/SAP Developer — *Sep 2018 – Jan 2025, Full-time*

- ***Full-Stack Java & Spring Boot:***
  6 years of full-stack development experience, designing and developing backend services and REST APIs with Java and Spring Boot within a microservices-like architecture.
- ***Front-End Architecture & Modern Frameworks:***
  Principal developer in SAP UI5 (MVC framework), with expertise in component-based architecture and modern JavaScript/TypeScript principles, providing a direct pathway to transitioning into React.js development.
- ***AWS & Cloud Fundamentals:***
  Hands-on experience with cloud-native application deployment and management on SAP BTP, with foundational knowledge and training in AWS cloud services and infrastructure.
- ***Technical Leadership & Agile Scrum:***
  Acted as Technical Lead and de facto Scrum Master for a multinational team; facilitated sprint planning, retrospectives, and mentored junior developers, scaling the team from 8 to 20+ members.
- ***DevOps & Code Quality Initiatives:***
  Championed code quality by establishing code review processes, introducing refactoring strategies, and building a Selenium/Cucumber (BDD) testing framework from scratch to enable Continuous Integration.
- ***End-to-End Project Lifecycle:***
  Managed the full Software Development Lifecycle (SDLC), from client requirement gathering and user story design to backend development, frontend implementation, and cloud deployment.
- ***Cross-Industry Solution Delivery:***
  Delivered robust, scalable software solutions for demanding sectors including healthcare, energy, and automotive, demonstrating strong analytical and problem-solving skills.
- ***Fluency in English:***
  Fluent in English (C1 level) and Spanish (B2 level), with a proven track record of effective communication in multinational teams and direct client/stakeholder engagement.

Education

Universidade de Coimbra — Coimbra, Portugal
Acertar o Rumo - Programação em Java — *Oct 2017 – Oct 2018*

- Developed 15+ projects in small teams addressing progressive web development challenges
- Created projects ranging from basic HTTP/CSS websites to advanced multiplayer web games with chat functionality
- Capstone project: Fully functional social network platform with comprehensive features including profile management, content sharing, friend connections, and real-time chat
- Technologies: Java, MySQL, Tomcat, JUnit, Java Server Faces, WebSockets, REST

Universidade de Coimbra — Coimbra, Portugal
BsC in Sociology; — *Sep 2011 – Jun 2014*

Skills

Programming: Java, JavaScript, Python, C, Lisp
Cloud & infra: AWS, SAP BTP, Cloud Foundry
Database: MySQL, Postgres, PL/SQL, SAP HANA
Methodologies: Agile, Scrum
Other: Linux, Vim, Bash, Git
Languages: PT (native), EN (C2), ES (C1), IT (A2), FR (A2)

Projects

Linux Debugger (Work in Progress) | *GitHub*

- A C++ CLI debugger for Linux operating systems running on x64 CPU's. Currently allows for reading and writing from and to registers and memory locations. Teaching me UNIX architecture, interprocess comunication, assembly and disassembly of programs, using syscalls, among many others.

Py Breakout | *GitHub*

- A clone of the classic Steve Wozniak's Breakout game for the Atari, developed with Python and TKinter, Python's standard GUI library. A good introduction onto designing a sort of physics engine and setting up projects for package distribution.

100 Days of Python | *GitHub*

- A collection of all the challenges solved while going through a Python bootcamp. Showcases skill in multiple subjects, from GUI developing, to web development, culminating in data analysis.

Java Shell | *GitHub*

- A native shell, built in Java. One of the first projects I developed when I started trying to understand low-level development.

Certificates

Udemy *Jul 2025*
100 Days of Code™: The Complete Python Pro Bootcamp

Refactoring Guru *Dec 2023*
Dive Into Refactoring

SAP Certified Development Associate *May 2023*
SAP Fiori Application Developer (expired May 2025)

SAP Certified Development Associate *Apr 2023*
SAP HANA 2.0 SPS05 (expired Mar 2025)

skillsoft *Feb 2023*
API Security

skillsoft *Mar 2022*
Go Programming Essentials
